Greetings!

The increase in the number of people reportedly afflicted of dengue in the country is very alarming. Dengue cases in Quezon City alone increased by more than 100% in the first seven months compared in the same period last year. Although despite this rise in number of dengue-related cases, city health officials certify that the disease has yet to reach epidemic magnitude. But this is still not a reason for us to be unworried and not to do precautionary measures.

In this regard, please be informed of the following:

- The girls from Kinder to Grade 6 are advised to wear their PE jogging pants.
- The female students at Grades 7-10 have the option to wear either their PE jogging pants or black pants together with their blouse uniform.

We shall allow the wearing of PE jogging pants or black pants until such time that the dengue-related problems are at least in minimal level. We can altogether be protected by being cautious and by staying away in areas/locations where dengue-bearing mosquitoes may lay their eggs.

Likewise, we advise our female faculty, REPS, and staff members to take the same preventive measure. Please be guided accordingly. Thank you.
